Ok

I haven't had any bleeding yet

I am feeling so sick from these pills. This is so traumatic knowing what is going on right now in my body. I am so, so sad right now

Do you understand how awful this is for me right now? This is worse than the first pill. To know I am going to physically lose the baby.

Did I make a huge mistake or are we actually going to end up together?? I hate this and this is only worth it if we end up working out. I am so nervous about everything.
